HTO

HOPPER TRAILER OPENER

The Door Demon HTO Hopper Trailer Opener is the latest innovation from the Arnold Company. Everything about this unit has been designed from the ground up specifically for truck hopper trailers.

Our customers made it clear that they needed the flexibility of a handheld unit with enough torque to get the job done, but not too much to avoid damage to the hopper trailer gate components. Rotation speed was also a critical factor, as the user needed to open the gate in an efficient, yet controllable manner.

Weight was crucial as the unit had to be light enough for the user to operate it all day long.

The new Patent Pending Door Demon HTO combines all of those features with a custom shaft and socket assembly designed for the task at hand.

IMPORTANT FEATURES

- ◆ Handheld to ensure user can feel the end of the gate track.
- ◆ Unique shaft and socket design prevents detachment while allowing sockets to be changed within seconds.
- ◆ Lever mechanism to manually lock shaft when needed.
- ◆ Lightweight at 12 pounds total weight.
- ◆ Air powered for safe use in dusty environments.
- ◆ Safe noise levels below 80 decibels.
- ◆ Speed set fast enough for efficiency but slow enough for complete control.
- ◆ Designed for hopper trailer gates with enough smooth continuous torque to do the job without damaging the gates.
