

QUICK-TACH SKID STEER MOUNTED

RAILCAR HOPPER GATE OPENER

The Quick-Tach Hopper Gate Opener utilizes a universal mount quick attach plate allowing it to be easily mounted to most skid-steers or similar loading devices. This unit's hydraulic motor is powered by the hydraulic system of the skid steer or similar device via the auxiliary hydraulic ports. This makes the Quick-Tach a great solution where power options such as air and electric are not available.

The unit has two pivot points, each locked in place with a 1" pin. The boom itself swings both left and right, plus the head also turns left and right. This allows the Quick-Tach drive shaft to be positioned as needed to access the railcar capstan.

BENEFITS:

- Prevents operator injury
- Increases unloading speed
- Single-person operation from seat
- Smooth, continuous torque
- Low maintenance cost

FEATURES:

- Utilizes skid steer's hydraulics – no other power source needed.
- Built in hydraulic flow control
- Several shaft positions
- Quick attach universal mounting plate
