

VACUUM MOUNTED VIBRATOR

Our Vacuum Mount Vibrator is perfect for applicators where there is no female pocket available and a permanent installation is not possible. These vibrators are available in an array of models, sizes, forces and frequencies making them ideal for concrete forms, refractories, railcar and **truck trailer hoppers**, plant bins, other types of hoppers or any application that demands vibrator portability.

This product eliminates destructive and expensive hammering on hoppers. Its single stage vacuum generator uses 10.6 SCFM air consumption.

BENEFITS:

- Eliminates clogging, bridging, and sticking in bulk bins and hoppers where noise reduction is an issue
- Eliminates destructive hammering on hoppers
- Takes the place of larger, heavier vibratory equipment

FEATURES:

- Pneumatic (air) powered to enable operation in hazardous environments
- Hand-held controls are easy to use
- Lightweight and portable at just 22 pounds
- Can mount to smooth surfaces such as wood, aluminum, and stainless steel
- Footprint: 20" in length by 7" wide
